

Memo: Texas Stream Team Support for implementation of the Upper San Marcos Watershed Protection Plan (2017)

January 10, 2017

To: Meredith Miller, Senior Program Coordinator

From: Jenna Walker, Texas Stream Team Program Coordinator

The purpose of this memo is to confirm TST support for the Meadows Center's and Texas Commission on Environmental Quality's efforts to implement the Upper San Marcos Watershed Protection Plan. TST staff and volunteers have been actively involved in Stakeholder Committee efforts, as well as technical assistance, education and outreach and data sharing and analyses since the first days of the plan.

Our staff and program will continue to provide, throughout the grant period (and in the interim):

1. Education and outreach support and materials;
2. Training and support of citizen science-based water quality and environmental monitoring;
3. Technical support and assistance with water quality analyses and coordinated water quality monitoring at strategic watershed locations;
4. Support for other efforts as they arise, including community presentations, events, forums, technical reports and related activities.

Jenna Walker
TST Program Coordinator
